Summary

Motivated MCA graduate with hands-on experience in **Python**, **Machine Learning**, and **AI application development**. Skilled in building intelligent solutions using **FastAPI**, **Scikit-Learn**, **TensorFlow**, **Pandas**, and **NumPy**. Developed projects including an **AI-powered recruitment platform**, a **voice assistant**, and an **ML experiment orchestration tool**, demonstrating strong **problem-solving** and **software development** abilities. Seeking an **AI/ML Engineer** or **Python Developer** role where I can apply my technical skills, contribute to **real-world AI projects**, and continue learning emerging technologies.

Technical Skills

- **Languages:** Python, C, C++
- **Frameworks:** FastAPI, Streamlit
- **Libraries:** NumPy, Pandas, Matplotlib, Seaborn Scikit-learn, TensorFlow
- **Databases:** MySQL, PostgreSQL
- **ML & Data:** Data Preprocessing, EDA, Feature Engineering, Regression, Classification, NLP, Model Evaluation
- **Tools:** Git, GitHub, VS Code, Kaggle, APIs, PowerBI, Advance Excel
- **Web:** HTML, CSS, JavaScript

Experience

PrernaGati Technology

Jan 2026 – jul 2026

Data Science Trainee

- PowerBI, Advanced Excel.
- Performed data preprocessing, data cleaning, and exploratory data analysis (EDA) using Pandas and NumPy.
- Built and evaluated machine learning models using Scikit-learn for regression and classification tasks.
- Applied feature engineering, feature scaling, and data preprocessing techniques to improve model performance.
- Visualized insights using Matplotlib and Plotly and evaluated models.

ASB Academy

Jan 2026 – Present

AI/ML Trainee

- * Developed and evaluated Machine Learning and Deep Learning models using Python, Scikit-Learn, and TensorFlow for real-world AI applications.
- * Built, trained, tested, and optimized predictive models through hyperparameter tuning and performance evaluation techniques.
- * Worked on NLP and Transformer-based solutions, gaining hands-on experience with text processing, model fine-tuning, and AI-driven applications.
- * Collaborated on end-to-end AI/ML projects and integrated models into backend applications using FastAPI while following industry-standard development workflows.

Projects

Skin Disease Detection | *Python, TensorFlow, Keras, CNN*

[GitHub](#)

- * Developed a deep learning-based image classification system using Convolutional Neural Networks (CNN) to detect and classify skin diseases from medical images, with image preprocessing, model training, and performance evaluation.

Airbnb Price Prediction | *Python, Pandas, Scikit-learn*

[GitHub](#)

- * Built a regression-based machine learning solution to predict Airbnb listing prices using data cleaning, exploratory data analysis, feature engineering, categorical encoding, and model evaluation.

Heart Disease Prediction | *Python, Scikit-learn, Flask*

[GitHub](#)

- * Developed a machine learning classification system for heart disease prediction and integrated the trained model with a Flask web application to deliver real-time predictions.

Education

Sardar Patel University, Mandi, Himachal Pardesh

2024 – 2026

Master of Computer Applications (MCA)

Rabindranath Tagore Government Degree College, Sarkaghat, Himachal Pardesh

2021 – 2024

Bachelor of Computer Applications (BCA)

Diploma in Computer Application (DCA)

Computer Applications
