Summary

Motivated MCA graduate with hands-on experience in **Python**, **Machine Learning**, and **AI application development**. Proficient in building intelligent solutions using **FastAPI**, **Scikit-Learn**, **TensorFlow**, **Pandas**, and **NumPy**. Delivered projects including an **AI-powered recruitment platform**, a **voice assistant**, and an **ML experiment orchestration tool**, showcasing strong **problem-solving** and **software development** abilities. Seeking to contribute as an **AI/ML Engineer** or **Python Developer**, applying

Technical Skills

- **Languages:** Python, C
- **Frameworks:** FastAPI, Streamlit
- **Libraries:** NumPy, Pandas, Matplotlib, Seaborn Scikit-learn, TensorFlow
- **Databases:** MySQL, PostgreSQL
- **ML & Data:** Data Preprocessing, EDA, Feature Engineering, Regression, Classification, NLP, Model Evaluation, Transformer
- **Tools:** Git, GitHub, VS Code, Kaggle, APIs, PowerBI, Advance Excel
- **Web:** HTML

Experience

PrernaGati Technology

Jan 2026 – jul 2026

Data Science Trainee

- PowerBI, Advanced Excel.
- Performed data preprocessing, data cleaning, and exploratory data analysis (EDA) using Pandas and NumPy.
- Applied feature engineering, feature scaling, and data preprocessing techniques to improve model performance.
- Visualized insights using Matplotlib and Plotly and evaluated models.

ASB Academy

Jan 2026 – Present

AI/ML Trainee

- * Developed and evaluated Machine Learning and Deep Learning models using Python, Scikit-Learn, and TensorFlow for real-world AI applications.
- * Built, trained, tested, and optimized predictive models through hyperparameter tuning and performance evaluation techniques.
- * Worked on NLP and Transformer-based solutions, gaining hands-on experience with text processing, model fine-tuning, and AI-driven applications.
- * Collaborated on end-to-end AI/ML projects and integrated models into backend applications using FastAPI while following industry-standard development workflows.

Projects

Skin Disease Detection | *Python, TensorFlow, Keras, CNN*

[GitHub](#)

- * Developed a deep learning-based image classification system using Convolutional Neural Networks (CNN) to detect and classify skin diseases from medical images, with image preprocessing, model training, and performance evaluation.

Airbnb Price Prediction | *Python, Pandas, Scikit-learn, Flask*

[GitHub](#)

- * Built a regression-based machine learning solution to predict Airbnb listing prices using data cleaning, exploratory data analysis, feature engineering, categorical encoding, and model evaluation.

AI Resume Analyzer | *Python, TensorFlow, LSTM, Streamlit*

[GitHub](#)

- * Developed an AI-powered resume classification system using a Bidirectional LSTM model to analyze resume content and predict relevant job categories.
- * Integrated the trained model with a Streamlit web application to provide interactive resume analysis and prediction confidence.

Education

Sardar Patel University, Mandi, Himachal Pradesh

2024 – 2026

Master of Computer Applications (MCA)

Rabindranath Tagore Government Degree College, Sarkaghat, Himachal Pradesh

2021 – 2024

Bachelor of Computer Applications (BCA)

Diploma in Computer Application (DCA)

Computer Applications
